

ABSTRACT OF DISCLOSURE

An object of the present invention is to provide a contents replay system capable of replaying desired contents at a specified place. The contents replay system includes a registration unit which registers location information indicating a specific location and contents information indicating contents to be replayed at the specific location designated by a user, a detection unit which detects that the contents replay system is currently located at the specific location and a replay unit which replay the contents at the specific location detected by the detection unit.
